1. Opening Remarks

Hey ya'll!

Since this technically is my first Executive Report I guess I'll reintroduce myself! I'm Johnny, a (almost) 2nd year Chemical Engineering Student and I'm excited for the opportunity to serve as this year's UTSU VP Professional Faculties! From getting to meet the rest of my executive team, to the board to all the staff within the UTSU that keeps the whole operation going, it's been a busy month getting familiar with all the parts of the organization.

This month, I've spent most of my time trying to work through some of the previous initiatives that Erica, the previous VPPF, worked on including her work on 2nd entry gym access, SAP allocation for professional faculties, an art market event and career programming. In addition, some initiatives I'll be working on in the coming months will include the aforementioned, professional faculty headshot events, orientation participation & tabling, general outreach, and CR/NCR. Obviously some initiatives are more short term than others so my hope is always to further these initiatives along, although not all will see the light of day by the end of my term (cough, cough CR/NCR).

Of course, if any student, professional faculty or not, ever has any concerns, questions or even initiative proposals, please reach out! I'd love to talk to you about whatever is on your mind. I'm here to try to make the UTSU a better place for everyone.

All in all, I'm super excited for this coming year (well, maybe not for my trillion courses) and the work me and the rest of the executive will accomplish. Hopefully I can look back on this report in a year and check off all the things I was able to get done and more.

2. Collaborations with Executive Team/Adjacents

Generally, I've gotten a chance to have meetings with most of the groups listed below! For anyone I haven't had the chance to have any sort of interaction with, I'm looking forward to it! For all executives, I got that chance to connect with everyone pretty well at our executive retreat!

2.1. President

Marie attended my first meeting with EngSoc together. I'll be working with her on creating regular meetings with student leaders from all colleges/faculties.

2.2. VP Finance & Operations

I've been helping Tony with a bit of policy and bylaw writing in the last month. Will be looking to work with him on the professional faculty SAP allocation initiative as well as assisting on the senate working group in the coming months.

2.3. VP Public & University Affairs

Assisted Nadège with some inquiries pertaining to pro-fac academic policy.

2.4. VP Student Life

Worked with Verona on securing club funding for PASA. Additionally, worked on preliminarily allowing engineering clubs into the UTSU clubs fair for this year.

2.5. VP Equity

Attended a tri-campus meeting to discuss priorities for the year.

2.6. Executive Assistant - Professional Faculties

Still in progress! Any professional faculty students interested, please apply!

2.7. Board of Directors

I was able to meet a portion of the team through both the first meeting as well as the initial board training. Excited to be working with ya'll for the remainder of this year.

2.8. Senate

I attended the senate meeting in the car on the way to Barrie with the rest of the executive team!

3. Departmental Interactions

It was wonderful getting to meet all the folks that allow the UTSU to run smoothly this month! Generally, I met everything through both orientation and the staff retreat.

3.1. Operations

Nothing substantive.

3.2. Programs and Services

I had a chance to be able to meet with CRS!

3.3. Outreach & Engagement

I worked with O&E on the UTSU submission to the engineering Frosh Handbook. O&E also helped order stickers for use in engineering Frosh kits. Will be working with them on headshots as well as orientation tabling in the future. I also sat on the website committee to assist in improving the website!

4. Pro Fac Initiatives

This month has been fairly fragmented in terms of my efforts, I've admittedly been kinda all over the place in terms of the stuff I've done and really dipped into different portfolios outside of my own.

4.1. PASA Funding

PASA reached out to me regarding the possibility of gaining funding for a tutoring initiative for their students. Being a fast-paced 2 year program with only a month in person per year, tutoring would be a great boon to PA students. As such, the executive committee has committed \$1,000 of executive initiative funding towards this initiative this year. PASA has also received \$499 of club funding. I'll be working alongside PASA to help them navigate funding and general challenges as they start up their course union.

4.2. Engineering Clubs in the UTSU Clubs Fair

I was able to push for engineering clubs to be included within the UTSU Clubs Fair. This will be a trial year with a max threshold of clubs being proportional representation. Based on my conversations with the EngSoc VP Student Life however, I would say that limit may not be reached.

4.3. Engineering F!rosh Campus Tours

The engineering F!rosh Campus Tours event brings all first year engineering students around the UofT campus to notable buildings and clubs. This year, I've reached out to the subcommittee chairs and have gotten interest from the chairs in including the UTSU Student Commons as an additional stop. I'll be working with them along with the UTSU staff on the logistics of moving over 1100 students in and out of the building.

4.4. Executive Report Template

I made the executive agenda template! Hopefully our reports are a bit more detailed moving forward.

4.5. 2nd Entry Gym Access

I met with the MedSoc UTSU Representative to discuss pushing the survey to more individuals. I want to try to aim for a three digit number of responses to get a more representative idea of interest in this initiative.

4.6. CR/NCR

I had a meeting with the EngSoc VP Academic regarding the feasibility of pushing this initiative further this year. I will also be following up with KPEUA on their willingness to push the initiative as well.

5. External Collaborations

I've made an effort to reach out to most first-entry professional faculty programs. Currently, I'm still waiting for some responses and am working towards reaching out to all second-entry faculties as well. Generally this year, consistent communication with all professional faculties is something I want to work towards.

5.1. EngSoc

This is probably the external group I've gotten the chance to work with the most this past month, therefore I'll be splitting this into a couple subsections just for readability's sake. EngSoc as a whole has been very responsive to my emails so I've been able to have more meetings with them compared to other groups.

5.1.1. President

I was able to have 2 meetings with Simona discussing how the UTSU and EngSoc will be able to work together this year. I'm looking forward to having a more productive working relationship with EngSoc moving forward. I will also be meeting with Simona shortly regarding fee raises by Campus Events and discuss our collective position on the issue before meeting with Campus Events.

5.1.2. VP Academic

We were able to have a quick chat about the feasibility of CR/NCR within engineering. This will be something that I will be working to assist in, as I also sit on the Undergraduate Assessments Committee where this proposal will have to go through in order to get approved.

5.1.3. VP Student Life

Reached out to Michael regarding having engineering clubs participate in the UTSU Clubs Fair, he will be forwarding the information onto engineering clubs.

5.1.4. Orientation Chairs and Subcommittees

Had a chat with Lesley, the orientation chair about ways that the UTSU could get involved with Frosh Week this year. I've communicated our interest in getting more involved with festivities this year. I was able to

also have a meeting with the Campus Tour Subcommittee Chairs regarding the possibility of including the Student Commons as a part of the engineering campus tour. The chairs seemed very interested in the idea. I'll be working with the chairs and various UTSU departments over the next little bit to work out the logistics of everything. Additionally, we may potentially look to continue our traditional sponsorship amount to F!rosh week to maintain our typical privileges (ie. video message and branding), waiting for an email from the sponsorship team before discussing this further with the rest of the executive team.

5.2. PASA

Outside of the funding initiatives I've discussed above, I'm now in contact with PASA which was something that hadn't been done before. Yay! I'll be working to support PASA for the coming year.

5.3. MedSoc

I was able to have a meeting with Karren the outgoing MedSoc UTSU Representative regarding the 2nd entry gym access survey which she will be pushing as well as transitions. Will be meeting with her and her incoming whenever elections finish

5.4. KPEUA

KPEUA has responded! However, they are currently in the middle of election season so I'm waiting for the incoming to be elected.

5.5. COSS

Had one initial meeting where we elected a chair.

5.6. OVPS

Had an initial introduction meeting on priorities for the year.

6. Closing Remarks

I kind of covered everything in my opening remarks, just in case ya'll don't bother to read this far. I'll reiterate some of what I said in my opening however.

Please reach out to me at any time (seriously, anytime) regarding any questions, concerns or random proposals you have for me, I'm all ears. I'm looking forward to working with the rest of the executive team, the board, all the staff at the UTSU and most importantly, the students.

Hopefully this is a good year!
